

ABA:74743507

CA1

This is a fluorescence microscopy image of a brain section, likely from a rodent. The image is divided into four quadrants by a white crosshair. The left half of the image shows a brain section with a prominent, bright yellow-green fluorescent signal in the upper-left quadrant, indicating a specific region of interest. The rest of the brain section on the left shows a more diffuse, blueish-green signal. The right half of the image is mostly dark, suggesting a control or a different experimental condition. The text 'ABA:74743507' is in the top-left corner, and 'CA1' is in the bottom-left corner.
