VMH

The image shows a coronal section of a rodent brain. A large, irregularly shaped region in the medial prefrontal cortex is highlighted in a solid blue color. This region is roughly symmetrical across the midline but slightly larger on the left side of the image. The rest of the brain tissue is shown in grayscale. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the lower part of the brain section.
