

ABA:74821753

OB anterior

A fluorescence microscopy image showing two distinct, bright blue fluorescent spots against a black background. The spots are positioned horizontally, separated by a small gap. A white crosshair is overlaid on the image, with its vertical line passing through the center of the left spot and its horizontal line passing through the center of the right spot. The text 'ABA:74821753' is in the top left, and 'OB anterior' is in the bottom left.
