

ABA:74881364

CA1

This is a fluorescence microscopy image of a brain section, likely from a rodent. The image shows a coronal slice with a central vertical sulcus. The CA1 region, which is part of the hippocampus, is highlighted in blue. The blue signal is concentrated in the upper part of the image, specifically in the area corresponding to the CA1 field. The rest of the brain tissue appears dark. A white crosshair is overlaid on the image, with the vertical line passing through the center and the horizontal line passing through the middle of the blue-stained area. The text 'ABA:74881364' is in the top left corner, and 'CA1' is in the bottom left corner.
