

ABA: 74990535

Tg

The image shows a fluorescence microscopy view of a specimen, likely a cell or tissue section. The specimen is stained with a blue fluorescent dye, which appears as a large, irregularly shaped area of blue signal against a black background. A prominent, bright, yellowish-green spot is visible near the center of the blue-stained area, indicating a region of high fluorescence intensity. The image is divided into four quadrants by a white crosshair. The text 'ABA: 74990535' is located in the top-left corner, and 'Tg' is in the bottom-left corner.
