

ABA: 75038412

SCN

The image displays a coronal cross-section of a brain, likely from a rodent model, with two prominent blue-colored regions representing areas of interest or activation. These regions are symmetrically located on either side of a central vertical axis. A thin white vertical line runs through the center of the image, and a thin white horizontal line runs across the lower portion. The background is black, and the text 'ABA: 75038412' is positioned in the top left corner, while 'SCN' is in the bottom left corner.
