

ABA:75081206

SPa dorsal

The image displays a dorsal view of a specimen, possibly a butterfly, against a black background. The specimen is represented by a large, irregularly shaped area filled with a color gradient from dark blue to bright yellow. The color gradient indicates intensity or density, with the brightest yellow areas concentrated in the lower half of the image. A vertical white line and a horizontal white line intersect at the center, dividing the image into four quadrants. The text 'ABA:75081206' is located in the top-left corner, and 'SPa dorsal' is in the bottom-left corner.
