

ABA:75144703

DM

A coronal brain scan image, likely a PET or SPECT scan, showing a cross-section of the brain. The image is predominantly black, with a large, irregularly shaped blue region on the left side (patient's right hemisphere) indicating areas of increased radiotracer uptake. A vertical white line runs down the center of the image, representing the midline. A horizontal white line crosses the image, representing the slice level. The text 'ABA:75144703' is in the top left, and 'DM' is in the bottom left.
