

ABA:75774682

M

This is a coronal PET scan of a human brain. The image is split vertically into two halves, likely representing the left and right hemispheres. The color scale ranges from dark blue (low activity) to yellow and red (high activity). A prominent, curved band of high metabolic activity is visible in the outer layers of the brain, particularly in the frontal and parietal regions. A smaller, more localized area of increased activity is also visible in the medial frontal region on the left side of the image. A white 'M' in the bottom left corner indicates the medial direction. The text 'ABA:75774682' is in the top left corner.
