VMH

The image shows a coronal section of a brain, likely from a rodent, with a blue-stained region in the ventral medial hypothalamus (VMH). The brain is centered, with the midline visible. The blue region is located in the lower part of the brain, symmetrically on both sides of the midline. A small, bright blue spot is visible in the lower left quadrant of the brain section. The background is black, and the brain tissue is a light gray color.
