

ABA: 77464962

SC

A coronal brain scan image, likely a PET or SPECT scan, showing a cross-section of the brain. The image is predominantly black, with a large, irregularly shaped blue region representing areas of increased radiotracer uptake. This blue region is located in the upper left quadrant of the image, extending from the top edge towards the center. A vertical white line and a horizontal white line intersect at the center of the brain, dividing the image into four quadrants. The text 'ABA: 77464962' is visible in the top left corner, and 'SC' is visible in the bottom left corner.
