

ABA:79488933

ME

The image displays a brain scan, likely an axial slice, with a color scale ranging from dark blue to yellow. The brain is centered in the image, with the left hemisphere on the right side of the frame. A vertical line and a horizontal line intersect at the center, dividing the image into four quadrants. The text 'ABA:79488933' is located in the top left corner, and 'ME' is in the bottom left corner. The brain tissue is predominantly blue, with several bright yellow and green spots indicating areas of high intensity or activity. These spots are concentrated in the central region, particularly along the vertical line, and in the lower right quadrant. The overall shape of the brain is roughly circular, with some internal structures visible as lighter blue areas.
