

ABA: 79544840

Hb

This fluorescence microscopy image shows a cell with two distinct signals. The ABA signal, labeled at the top left with the number 79544840, is represented by a bright blue, multi-lobed structure on the left side of the cell. The Hb signal, labeled at the bottom left, is represented by a solid, dark blue structure on the right side of the cell. A white crosshair is centered over the image, dividing it into four quadrants.
